

COMPANY PROFILE

2023

Web Development | Web Design | UI/UX | Search Engine Optimization | Media Development

Our tools and methods in delivering projects

Wordpress + Elementor Pro

Combined as the Content Management System for our clients to independently manage their own websites, **coding-free**.

Web/App Design tools

Figma and Adobe XD to develop **pixel-by-pixel** web/app designs in line with global standards

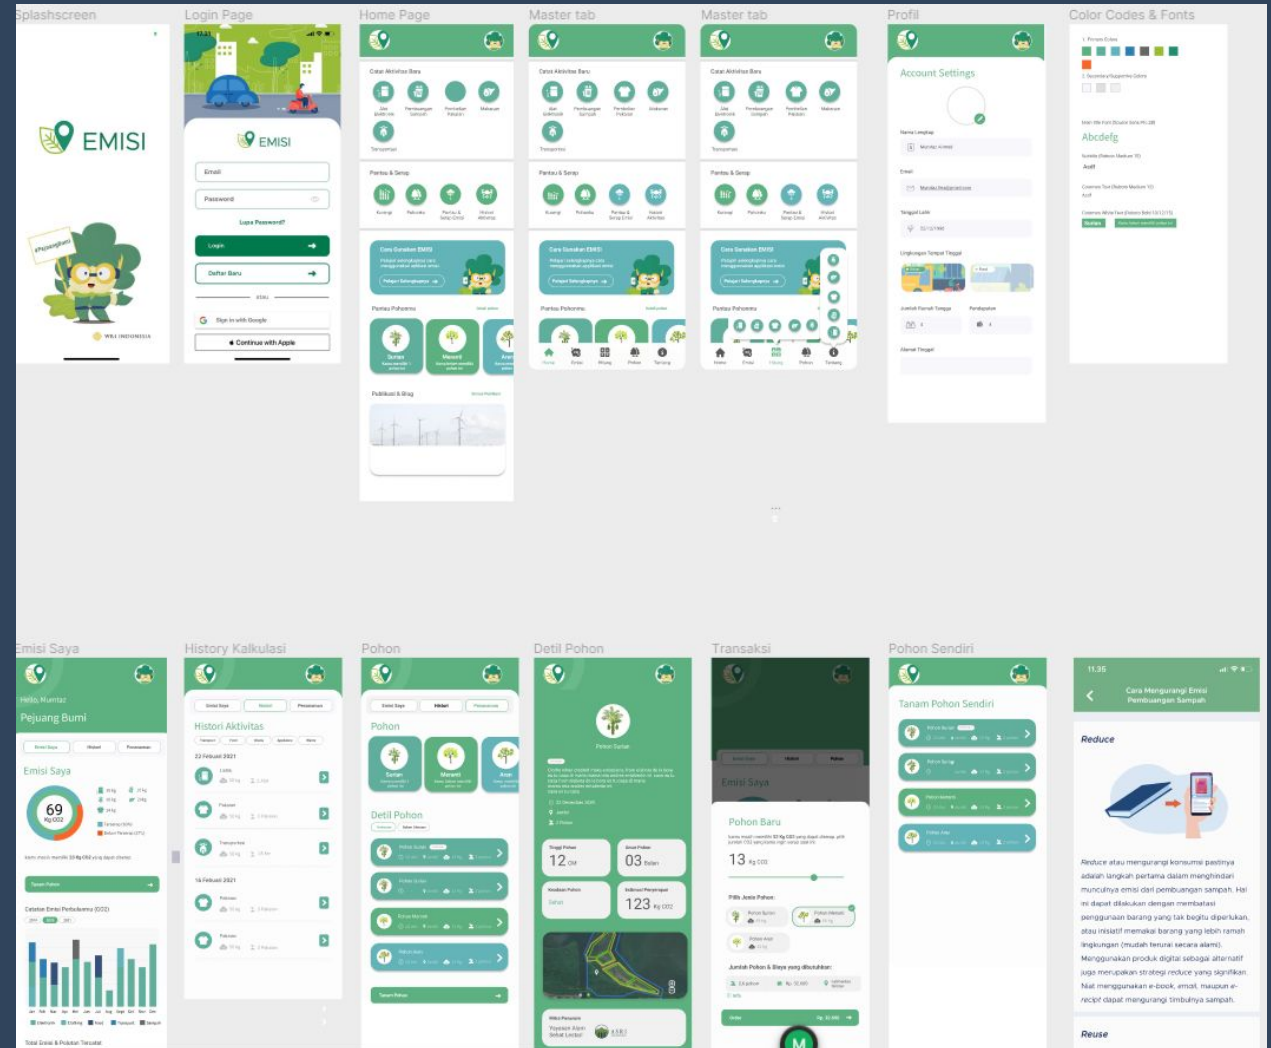

Graphic Design tools

Adobe photoshop and Adobe Illustrator **globally** used for graphic design, photo editing and logo development

Videography

Final Cut Pro and Adobe Premier for video editing

The value we bring to the digital presence industry

1

Cost-efficiency

Our simplistic operations and communal freelancer network model provides our clients with one of the most competitive prices in the Indonesian market.

2

WordPress-focused

All of our website projects use WordPress as a Content Management System (CMS). This allows our clients to edit, manage and maintain their own websites post-project without any necessary coding skills.

3

Global experience

Having experience outside of Indonesia enables us to be aware of necessary information for your digital needs, such as China's great firewall, Europe's GDPR policy and even Indonesia's PANDI* requirements.

4

English proficiency and academic background

Our team is capable of proficient speaking and written English that is fairly uncommon to find in our industry.

52 Websites

Have been developed with the support of our team.

16 Other projects

Including app development, social media management, logo development, design support and more.

6 Countries

Experienced working in environment of mainly Indonesia but also Malaysia, Singapore, China, UK and US.

*PANDI: Pengelola Nama Domain Internet Indonesia dibawah Kementerian Informasi
